

Safety harness kit no.1

Product information

The safety harness set includes a harness, 15 m safety rope with a rope grab and a energy absorber with a safety connector. The 15 m safety rope ensures a sufficient operating distance for most common work situations.

The products are suitable for many jobs requiring fall protection, such as snow removal, janitorial work and various roofing jobs. The safety rope or fall arrest (optional) can be attached to the anchorage point at the front of the harness or to the metal D-loop at the back. The size of the harness can be adjusted via the chest straps and thigh straps.

The harness is sized for users of sizes M-XL and manufactured in accordance with EN 361. See the harness dimensions on the additional information tab.

CONTENTS:

- safety harness P-03, size M-XL
- safety rope/equipment
- kernmantle safety rope Ø 12 mm
- length 15 m
- material polyamide
- integrated rope grab + ABM energy absorber
- safety connector on energy absorber: AZ002, opening 18 mm, weight 220 g
