

Table model press tool for wire rope ferrule locks 2,5-5 mm

Product information

Table model pressure and locking tool is suitable for 2,5-5 mm ferrule steel rope locks. The tool can be bolted to the work surface, which makes working more stable and ergonomic. The tool is used to press a ferrule lock suitable for steel ropes, which locks the steel rope to e.g. a loop. The handle is equipped with a rubber coating, which guarantees a firmer grip on the tool.

Material: Steel
Finish: Painted
